

STM32H7 CAN Sniffer

STM32H743I - Real-time CAN Bus Monitoring & Configuration

[Home](#)

[CAN Setup](#)

[CAN Trace](#)

Welcome

Here you can check and configure the STM32H7 CAN sniffer remotely. Use the navigation menu above to access different functions.

CAN Setup

Configure CAN channels, set baudrates, and control the sniffer operation. Apply changes or save them to SD card.

CAN Trace

Download captured CAN logs and parse them for analysis. View data in an organized table with pagination support.

Remote Access

Control and monitor your CAN sniffer from anywhere through this web interface.
