

STM32H7 CAN Sniffer

STM32H743I - Real-time CAN Bus Monitoring & Configuration

CAN Sniffer Control

Start or stop the CAN sniffer activity. Ensure configuration is applied before starting.

Start

Stop

CAN Configuration

Configure CAN channel settings. Stop the sniffer before applying changes. Click **Apply** to use the new settings immediately, or **Save** to persist them to the SD card for use after restart.

SETTING	CURRENT VALUE	NEW VALUE
CAN1: Baudrate	1 Mbit/s	
CAN1: Operating Mode	normal	
CAN2: Baudrate	1 Mbit/s	
CAN2: Operating Mode	listen only	

Apply Configuration

Save to SD Card

SD Card Management

Format the SD card to recover from file system corruption or other issues. The format request will be queued and executed on the next system restart.

Warning: This will erase all data on the SD card.

Format
